SUMMARY

Information Technology student with hands-on experience building full-stack web and mobile applications. Skilled in Laravel, MySQL, React, and Tailwind CSS, with academic project experience in API development, database design, and agile collaboration. Seeking an entry-level developer or internship role to contribute practical software solutions and grow as a software engineer.

TECHNICAL SKILLS

Frontend & UI/UX: React, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Figma

Backend & Databases: PHP (Laravel), Python (Django), Java (Spring Boot), MySQL, RESTful APIs

Tools & Deployment: Git, GitHub, Docker, Supabase, Vercel, Firebase, cloud deployment

Practices: Systems analysis and design, Agile/Scrum, team collaboration, problem-solving

TECHNICAL PROJECTS

Pagkainang-Sambayanan | Full Stack Developer

- Built a food donation platform using Laravel and MySQL, with a disaster-aware "Emergency Mode" to support real-time relief distribution during crises.

Cany | Full Stack Developer

- Developed a grocery budgeting application with real-time item scanning to help users track expenses and manage their budgets.

Readerly | Full Stack Developer

- Built an online reading coach application to support literacy development for elementary students who struggle with reading.

EDUCATION

Bachelor of Science in Information Technology

Aug 2023 - Present

University of Cebu Lapu-Lapu and Mandaue

Relevant coursework: Systems Analysis and Design, Database Management Systems, Web Development, Software Engineering

- Collaborated in agile academic teams to design database schemas, build secure APIs, and deliver software projects within deadlines.
- Additional academic projects included a real-time transit tracking system and automated 3D modeling solutions.
